

# Safe Distancing Assistant

In an effort to help our Customers with the challenges of COVID-19, we have rapidly developed a custom version of our Asset Beacons to act as training and enforcement devices for safe personal distancing in the workplace.

We know by now that the virus spreads primarily by through person-to-person contact and that we can protect ourselves by keeping our distance from each other. This rule, while crucial, is taking time to adapt to.

The light, discreet tag emits a short audible alarm when another wearer is detected within 2 metres to advise both wearers to check their distance.

Devices can be returned to Pathfindr when no longer required and we will re-program them for use as standard asset trackers.

## Features

- Audible warning when in close proximity
- Adjustable volume
- Only operates when worn
- Can be re-purposed as asset tracker
- FOD aware design
- Very low power, safe to wear
- Low profile, lightweight form factor
- Coolant and oil resistant
- Silicone free

## Technical Details

- Low Power Bluetooth (2.4Ghz)
- -30dB (0.001mW Radio TX power) 3
- Lithium metal 1000mAh
- Small form factor (58x33x9mm)
- IP65 enclosure as standard
- ROHS compliant
- All components CE / FCC certified
